INSPIRATION

From haute to homey, from privilege to practical, curated items selected by TA

harder steel and more chromium content, today's knives can be a challenge. This impressive double-sided diamond-surfaced sharpener from **DMT** - Diamond Machining Technology - puts a truly pristine edge on any knife in a fraction of the time of traditional sharpening systems.

The high-tech DuoSharp Sharpener will quickly return that fine edge to the toughest kitchen knives, whilst removing a minimum of material from the blade.

How does it work? DuoSharp uses two interrupted surfaces of superior diamond to provide 2-stage sharpening. This is the ultimate choice for bench sharpening, with a large, wider diamond surface to hone a variety of edges.

Diamond abrasives provide the fastest, easiest and most effective way to sharpen an edge. Made in the U.S.A., the DMT's sharpening surface carries the most diamonds per square inch in the industry, combined with a proprietary process that ensures near-perfect consistency in grit size. We also like that the sharpener is available in many different diamond grit combinations.

Engineered to be precision-flat, DMT's knife sharpeners are best in class with undeniable long-lasting performance and durability.

As lovers of the culinary art, we are genuinely thrilled with this fabulous tool. It offers the true culinary edge.

Doing the laundry has never been so wonderfully chic

Millefiori has brought its fragrances to the world of laundry, and has created a luxury detergent collection that allows for the care of linens and garments that luxury fabrics deserve.

Beautifully packaged in a glass bottle, complete with a specially designed ceramic measuring cup, the perfumed have been developed to add a delicate and long-lasting scent to laundry. The detergent is perfectly formulated to tackle all that dirty laundry by preserving colours, avoiding fading and fighting stains.

Sublimely scented, irresistibly luxurious, Millefiori Milano detergents are made in Italy from only the finest Italian and French fragrances.

This lovely product really works well, and is now a staple in our laundry room.

Perfect for everyday luxury

Soft, natural and timeless, kitchen linen towels are naturally beautiful. Highly absorbent, lint free and easy to care for, pure linen tea towels are a real helper in the kitchen. Highly functional, linen fibres are long and durable, stronger wet than dry, and stronger than cotton.

Add style and lavish absorbency to the kitchen with these elegantly designed kitchen linen towels from **Balmuir**. Each well-appointed linen towel comes with a handy loop and will leave even those fanciest glasses lint free. Made from 100% European washed linen, they come in 12 handsome colours.

The embodiment of elegant simplicity, these lovely classic pure linen towels will add sophistication to any home.

Form meets function in the modern butter dish

Created by internationally recognised product designer **Sebastian Conran** for

Millefiori

Balmuir

Universal Expert, this modern butter dish has a thoughtful and ingenious approach, combining functional innovation with stylish practicality.

The butter dish's clean, simple lines add to the timeless, elegant aesthetic of any modern kitchen.

Expertly designed, it features a white porcelain container and solid beechwood lid that doubles as a chopping board – facilitating the scooping or slicing of butter, depending on its temperature.

This stylish butter dish is not only beautiful, it is beautifully practical, too – a must-have for our white kitchen.

The must-have tool in modernist cuisine

Ask the modernist chef, pastry chef, barista or mixologist about the tools they absolutely can't do without, and many of them are going to say the iSi Thermo Whip is an integral part of their workday.

This beautifully engineered, superbly built, professional-grade dispenser now allows adventurous home cooks to impress guests with hot and cold savoury foams (espumas), frothy soups, airy sauces, rapid infusions, mousses, fluffy and light batters, and marinade injections.

The ingenious tool uses gas and pressure to whip up culinary treats in just a matter of minutes, instead of hours, with incredible results.

The double-walled stainless steel vacuum bottle comes with maximum insulating performance. Thanks to its thermal capabilities, culinary creations may be kept cold for up to eight hours, or warm for up to three hours.

For the ultimate dinner party, we love that we can whip up impressive, modernist restaurant-style dishes at home with this very versatile tool.

An ideal combination of power and performance makes the ultimate fruit smoothie

Creating deliciously healthy smoothies each day becomes incredibly simple with the speed and power of the Nutri Ninja by **Ninja Kitchen**. Just throw the ingredients into the blending cup, pulse blend for less than a minute, and instantly enjoy that smoothie.

Considering its compact size, we are in awe with how powerful this blender is. With its 900-watt motor and 21,000-RPM extraction blades, every blending job gets done quickly and efficiently. Even when adding something hard, such as chia seeds or flax seeds, the machine can still pulverize to make for smooth drinking.

Providing a powerful nutrient- and vitamin-extraction performance, this machine has been expertly designed to extract the maximum amount of vitamins and nutrients from fresh ingredients, incorporating all the fibre from fruits and vegetables. The steel blades break down whole fruits, vegetables, stems, seeds and ice in seconds, to deliver a smooth consistency with absolutely no chunks.

Besides its flawless performance, we also love how easy this small workhouse is to use and clean.

Whether jumpstarting a healthy lifestyle or for the fitness enthusiast, we cannot think of any better way to start the day than with a green smoothie.
